## Education

**National Institute of Technology, Rourkela**

*Bachelor of Technology in Industrial Design Engineering (CGPA - 7.30)*

**Sept 2023 – May 2027 (Expected)**

*Rourkela, Odisha*

**Triveni Higher Secondary School, Padmapur**

*CHSE Odisha, Science (PCM) (Percentage - 84.3%)*

**June 2023**

*Rayagada, Odisha*

## Relevant Coursework

- UI/UX Design Principles
- Interaction Design
- User Research
- Human-Centered Design
- Wireframing and Prototyping
- Design Thinking

## Work Experience

**HelpRevX Software Private Limited**

*Applied AI Engineer Intern – Product & UI/UX*

**May 2026 – Present**

*Remote / India*

- **Vidyapeeth360 (K-12 school ERP):** Designed the **complete website UI** from **wireframes** to shipped screens, and created the **logos for both Vidyapeeth360 and HelpRevX**, giving the two products one consistent brand system.   
Live Site 
- Wireframed and designed the **end-to-end school registration and onboarding flow**, cutting the time a school needs to get set up — onboarding friction was the single biggest reason schools refused to adopt a school ERP at all.
- Built the ERP's **information architecture** around four audiences — administrator, teacher, student, parent — each landing on its own first screen.
- **aayiq (omnichannel CX platform):** Designed the **AI-to-human handoff** — what the customer sees when the assistant escalates, and how the agent picks up with context intact.

## Projects

**BFSI Risk Intelligence Platform**

*Product Design, Explainable AI, Data Visualisation, Figma*

**Jan 2026 – Feb 2026**

*Case Study | Live App*

- Designed a single credit-officer interface over **four separate lending-risk models**, so an officer reviewing an application never has to reconcile four different tools.
- Built an **explainability panel** that surfaces why a score came out the way it did, on the principle that a decision an officer cannot defend is a decision they will not make.

**YatraAI – Group Travel Planning Platform**

*AI/UX, Interaction Design, Prototyping, Figma*

**Nov 2024 – Apr 2026**

*Case Study | Live Demo*

- Designed group itinerary planning so that **no member's preferences get quietly averaged away** — the interface shows whose needs a plan is currently under-serving instead of reporting one group score.
- Designed the assistant to **abstain and say so** when its knowledge base cannot answer, and to cite the source when it can, rather than filling the gap with a confident guess.

## Achievements / Certifications

- **Winner, April Cohort Hackathon** (April 2026) — first place for **YatraAI**, judged on the shipped product: a fair-selection model that surfaces the **least-satisfied traveller** rather than a group average, and an assistant that **abstains rather than guesses**. Case Study
- **Applied AI Engineer Intern, HelpRevX** (2026) — design and product work across two live products. Certificate

## Technical Skills

- **Design:** Figma, FigJam, Prototyping, Design Systems, High-Fidelity UI, Visual Identity & Logo Design
- **UX Methods:** User Research, Personas, Journey Mapping, Information Architecture, Wireframing, User Flows
- **AI & Data for Design:** AI Interface Design, Explainability Patterns, Data Visualisation, Python, Pandas, Scikit-learn
- **Frontend:** HTML, CSS, JavaScript, TypeScript, React / Next.js, Responsive & Accessible Design, Git / GitHub

## Extracurricular Activities

- **Secretary, AXIOM – Mathematics Club, NIT Rourkela** (2024 – Present) — problem-solving events for **500+** participants.
- **President, LEO Club, NIT Rourkela** (2024 – Present) — led donation drives and community awareness campaigns.
