Education

National Institute of Technology, Rourkela

Sept 2023 – Expected May 2027

Bachelor of Technology in Industrial Design Engineering (CGPA: 7.30/10)

Rourkela, Odisha

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Web & API Engineering
- Object Oriented Programming
- Machine Learning & AI
- System Design

Work Experience

Applied AI Engineer Intern

May 2026 – Sept 2026

HelpRevX Software Private Limited | {Certificate}

Remote / India

- **aayiq (Omnichannel CX Platform):** Architected a multi-channel RAG pipeline using NestJS, FAISS, sentence-transformers, PostgreSQL, and Redis BullMQ, enabling context-aware customer responses across WhatsApp, WebChat, Email, SMS, and Voice with automated agent fallback
- **Vidyapeeth360 (School ERP):** Designed an end-to-end K–12 School ERP covering administrator, teacher, student, and parent roles, architecting database schemas, REST APIs, and predictive AI insights.

Projects

CodeSync– Real-Time Collaborative Code Editor |

[Live Demo](#) |

 [GitHub](#)

Sept 2025 – June 2026

MERN, Socket.IO, Yjs (CRDT), Monaco Editor, JWT

- Engineered a full-stack collaborative code editor using Yjs CRDT, guaranteeing zero data loss during concurrent edits by leveraging the same class of algorithms that power Google Docs and Figma.
- Implemented a dual real-time WebSocket architecture: Yjs for conflict-free code synchronization and Socket.IO for cursor presence, chat, and code execution broadcast.

YatraAI – AI-Native Group Travel Platform |

[Live Demo](#) |

 [GitHub](#)

Apr 2024 – May 2026

Python, FastAPI, PostgreSQL + pgvector, LangChain, Qdrant, Docker

- Architected a travel itinerary planner pairing Google OR-Tools CP-SAT deterministic scheduling with a hybrid RAG layer (dense pgvector + in-Python BM25 + RRF ranking).
- Established an evaluation harness over a 34-question benchmark achieving 0.903 top-1 accuracy and 0.952 MRR, backed by a 31-table PostgreSQL schema, Alembic migrations, and 338 automated unit/integration tests.

BFSI Risk Intelligence Platform |

[Live Demo](#) |

 [GitHub](#)

Jan 2026 - Feb 2026

Python, Scikit-learn, Pandas, NumPy, Streamlit

- Built an end-to-end credit risk assessment and decision engine consolidating loan default prediction, fraud detection, customer churn, and payment-collection risk.
- Trained Logistic Regression and Random Forest models, engineering financial features and mitigating 5% class imbalance via cost-sensitive learning, Precision-Recall tuning, and Streamlit interactive deployment.

Technical Skills

- **Languages:** C++, C, Python, JavaScript, SQL, HTML/CSS
- **Developer Tools:** Git, GitHub, VS Code, Postman
- **Technologies/Frameworks:** React.js, Node.js, Express.js, MongoDB, PostgreSQL, Prisma, Tailwind CSS

Achievements & Certifications

- **Winner, HACKATHON 2024:** Built YatraAI, an AI itinerary generator. {Live Demo} **April 2024**
- **Problem Solving:** Solved 600+ DSA & SQL problems; **LeetCode rating 1605.** {Leetcode}
- **Full Stack Generative and Agentic AI with Python** — Udemy, 32.5 hours. {Certificate}

Extracurricular Activities

- **Secretary – AXIOM (Mathematics Club, NIT Rourkela):** Created problem sets and organized problem-solving and technology events for 500+ participants. **2025 – 2026**
- **Secretary – LEO Club (Lions Clubs International):** Completely managed Club and it's events. **2024 – 2025**
